Description reads: "Within a stone's throw of the sheer wall of the canyon, the Hoppi House is located, an irregular stone and adobe structure built to resemble an Indian pueblo in miniature and from which point the start is usually made to Bright Angel Trail and the descent to the bottom. [¶] Our first picture shows a Hoppi Indian buck, squaw and papoose in the quaint garb of their tribe and changes to a very animated picture in which a 4-horse coach is loading with passengers leaving for Bright Angel Trail. On the way a panorama of the canyon walls is unfolded to view before the audience. A stupendous picture that lies wholly beneath the eye as if the spectator stood upon a mountain peak instead of the level brink of a fearful chasm in the plateau whose opposite shore is 13 miles away." (ENTIRE NOTE) Page 333 (General Alphabetical Index) correctly spells "Hopi House" in the title, where also is noted the lease price of the film at $19.50.] [Film is cited herein as Motion Picture Patents Company, no date, ITEM NO. 26.593. [Farlee Hotel, Peach Springs Canyon] (p. 769). [¶] "Breakfast at Mohave. (I must send you a railroad map.) There took the Atlantic & Pacific Railroad, over the sandy desert to the Great Colorado at supper, to Peach Spring station at two A. M., and next morning in an easy 'buckboard wagon' twenty-two miles and 4,000 feet descent into this wonderful cañon, a piece of it, which its explorer, Major Powell, has made famous. [¶] This afternoon and evening we are to get up and back, and on in the night and morning to Flagstaff, and the ancient cliff dwellings." (p. 771) [he did not make it to the cliff dwellings (Walnut Canyon)]. [¶] "May 8 [. . .] The cañon trip well repaid the journey and its rough accessories. Some of the views are those depicted by Powell.

[. . .] From Mohave to the Colorado is very sandy and complete desert, descending eastward many hundred feet. Near Mohave lots of tree yuccas [Joshua trees], looking very like those in northern part of Mexico. From the Colorado to Peach Spring we passed in the dark, but had risen to about 6,000 feet, and we kept on an elevation of 4,000 to nearly 8,000 feet all across the rest of Arizona and New Mexico, the higher parts wooded with conifers, that is, Pinus ponderosa of the Rocky Mountains form and Juniperus." One ofter wonders if this Cañon were the real 'city of gold,' for the discovery and possession of which more than one continent wasted its blood and treasure. It would take no great stretch of the imagination to fancy that the glittering and sparkling mica-bearing formations responding to the sun's rays were houses built of gold. The tradition of this city was not a dream. Some one had observed something. For want of better description the vision was called a 'city of gold.' [Includes general remarks concerning operations from Fort Yuma and climatological data, but principally concerning Indigenous peoples of the region.] [Regarding a map, Heintzelman (p. 52) notes: "In January, 1851, I descended the Colorado in a small boat to meet the schooner Invincible sent around to try the mouth of the river with a small supply of provisions. From the notes I took, the sketch of the mouth of the river by Lieutenant Derby [see Derby, 1852, CARTOBIBLIOGRAPHY ITEM NO. 25.803; Cartobibliography is THE GRAND CANON Volume 2], topographical engineers, and the notes taken by me on our expedition against the Indians in September, 1852, the accompanying sketch of the river for near 250 miles has been made. It is merely a rude reconnoissance, but sufficiently accurate to give an idea of its course for that distance. No railroad can follow its banks." The map is not published in the Congressional report. Wheat (1959, Volume III, pp. 213, 308; Volume V, p. 373) briefly comments on this manuscript map by Heintzelman, which is in the Emory papers at Yale University. Wheat (Vol. III) had originally not found the map for examination and credited (p. 308) Dale Morgan for a brief description of the map (p. 213). In Vol. V (1963, p. 373)

Wheat notes he had at last seen the map and catalogs it (in square brackets) as "[Map of the Colorado River from the mouth of the Gila to the Gulf of California, signed S. P. Heintzelman Capt. 2 Infy & Bvt. Major Jan. 1851. Manuscript; 10½ by 16$^{9}/_{16}$ inches.]".]

1907 2.30278 In "God's reservation". *Christian Advocate* (Methodist Episcopal Church, South, Nashville, Tennessee), 68(33)(3480): 1030-1031 (also paginated concurrently for issue, 6-7). [Begins with remarks on the Petrified Forest, but is principally about Grand Canyon. Includes the notable statement (p. 1031/7) (among other misstatements): “It is not strange, then, that men should be afraid of these awful depths, which dispute any one’s right to enter them. Only two successful expeditions have ever been made the entire length of the canyon, and even the leaders of these, Major Powell and Mr. Stanton, were once and again dragged by their men from the water after losing consciousness.”]

2010 2.31213 Seasonal resident artist speaks out. *Ranger* (Association of National Park Rangers, Journal), 26(3) (Summer): 13-14. [Henkel has been a seasonal interpretive park ranger, who in December 2009 was a resident artist at Grand Canyon. “A typical requirement of a residency is to donate a piece of your art work to the park’s museum collection. While I was at the Grand Canyon, I was able to view the collection of artists’ work dating back to 1905. I wondered why these aren’t available for the visitors to see, but space always is an issue.” Regarding the art collections here and at other parks, “If only there was a way to exhibit the wonderful collection of work that interprests the parks so well. I’m interested in curating a traveling exhibit of artist-in-residence work to various national parks.”]

"Rio Colorada" [*sic*] is shown between a stylized head of the Gulf of California (not labeled) to the confluence of "Rio Virgen", east of which the Colorado is shown (in the western Grand Canyon area at the eastern edge of the map) vaguely following a northwestward route to that confluence. "Lt. Mowry's Route" is shown between "G.S. Lake City" to "Los Angeles", passing through "Las Vegas". Also shown are desert routes between San Diego and Fort Yuma.] [*NOTE*: Appendices A 1 [see ITEM NO. 2.29136] and A 2 are often confusingly cited under variations of a single, contrived title that makes this item difficult to locate. 1930 2.31048 [Remarks on the second Powell expedition.] *In: Contributions to Western Botany, No. 17.* Claremont, California: [no imprint] [Marcus E. Jones], p. 37. [Scarce enough to reprint in its entirety: "In June, 1929, I visited El Tobar [*sic*] on the southern side of the Grand Canon and saw the stately monument erected to Major Powell and the band of Government men who accompanied him down the Colorado river in 1871, on that blood curdling trip. The secrecy that has always surrounded that trip and his work surveying the Grand Canon has always been a puzzle to me. Forty years ago or more I made the acquaintance of one of his party, the topographer, Captain F. M. Bishop of Salt Lake City, and he was a fellow townsman for many years till my removal to California. His herbarium made on that expedition has always been in my own collection, all the types not now at Harvard. [¶] On the visit referred to I failed to see his name among the list of those who traversed the Grand Canon, and for this reason I hunted him up, now a very old man, at Salt Lake, and conferred with him about the matter. During the conversation his daughter showed me a transcript of his diary, fragmentary but complete as far as it went, which throws a flood of light on the expedition, and its asinine management. I borrowed the M.S. and have copied it, and some day, may possibly publish it. Captain Bishop was one of the very few educated men in the party, and was the center of the botanical activity, making the best collection, but Mrs. Thompson, the sister of Major Powell [Ellen Louella "Nellie" Powell], sent her collections to Harvard independently. Captain Bishop was later the Professor of Botany at the State University in Salt Lake City." (ENTIRE ITEM)]

2018	2.28093	Colorado River 2017. Grand Canyon—když se vysloví tato dvě slova, téměř každému se vybaví Severní Amerika a v ní Spojené státy americké, zvané zkratkou USA. O něco méně lidí ví, že se kaňon nachází v severní Arizoně, v jednom z padesáti členských států USA, nepočítáme-li federální distrikt Washington D.C. Každý jistě ví i to, že touto, z hlediska geologie a geografie, jedinečnou přírodní lokalitou protéká řeka. *Pádler* (Záboří nad Labem, Czech Republic), (Winter): 40-43. [28] *NOTE* regarding E. L. Kolb’s *Through the Grand Canyon from Wyoming to Mexico*: *Variants of this title are cited separately herein.* The Macmillan variants of this publication, 1914-1971, hold the second-longest documented record of a Grand Canyon–Colorado River title *continously in print*, appearing in 27 editions/printings under the Macmillan imprint (Quartaroli variants A-AA), 57 years. Because it is not clear how long Macmillan sold copies itself (in later years Emery Kolb was essentially the principal outlet for sales, at Grand Canyon), it was likely continuously available for 62 years, until Emery’s death in 1976. The disposition of remaining copies in Kolb’s possession upon his death is not known, and it is not clear that the work was available from Macmillan thereafter (*fide* Richard D. Quartaroli). The Quartaroli variants A–FF, which include established reprintings following the Macmillan years, are itemized in Appendix II to this bibliography. More recent reprintings published on demand by various producers (see undated ones listed first, and dated ones within the citations after 1971) are not assigned variant identifications by Quartaroli.

Grand Canyon, Arizona: Grand Canyon Association, xvii [xx], 392 pp., blank leaf, rear flyleaf with Grand Canyon Association colophon on verso. [Photographs by Ellsworth L. Kolb and Emery C. Kolb.] [**Quartaroli variant FF.** *Stated date (copyright) 2007; reprinting date not indicated but determined by Quartaroli (see points listed here)*. Facsimile reprint of text of October 1914 ed. (= *Quartaroli variant A*); *variant FF* is an unstated 3rd printing of Kolb (2007, ITEM NO. 2.11482, *Quartaroli variant DD*), but with title-page verso containing Grand Canyon Association copyright and publication data. *Other points for variant FF*: 1) Pagination revised to include plates, with plates repositioned such that the blank versos are omitted (the repagination eliminates the original pagination of the facsimile); 2) cover pattern color blue; 3) cover illustration refigured from Kolb photograph to include skyline of cliff at upper left of photo; 4) photo ornamental border is a single yellow line creating a box; 5) title typographically reset with "GRAND CANYON" in white capital letters, the remainder in yellow with "WYOMING" and "MEXICO" in capital letters, and author's name in white upper- and lower-case letters; 6) spine reset and redesigned to read horizontally with book standing; 7) back cover reset and redesigned, with photograph of the Kolb brothers and their boats added, and Grand Canyon Association colophon added; 8) title-page verso data revised and reset, omitting reprinting data and editorial information,

addition of Ellsworth Kolb's dedication at top of page, and Grand Canyon Association colophon with pictorial relief, replacing two-tone colophon of earlier printings; 9) front flyleaf is the original half-title page (p. [i]) redesigned to include photographic portrait of the Kolb brothers with original frontispiece on verso (p. [ii]); 10) Todd R. Berger's "A Note About the 2007 Edition" moved to p. [v].]

Co., which was recently purchased by the Union Pacific System, will within a short time build a branch line running from Lund, Utah, to Bright Angle [*sic*] Point, which is on the North rim of the Grand Canyon. This branch will open up a large and fertile farming land in Southern Utah, as well as new coal fields and the Kaibab forest. This extension when constructed will touch one of the largest timber reserves in the United States, and as well as a commercial road will be a scenic route.” (ENTIRE NOTE)] [Bright Angel Point.]

The manuscript quoted here is a direct transcription from the original journal, by E.E.S. November 28, 2017, so as to compare the varied transcriptions published by Biddle (1814, in edited form; see Lewis, 1814, ITEM NO. 2.26326), Coues (1892, in edited form; see Lewis, 1892, ITEM NO. 2.26327), Thwaites (1904; see Lewis, 1904, ITEM NO. 2.26296), DeVoto (1953; see Lewis, 1953, ITEM NO. 2.26328), and Moulton (1988; see Lewis, 1988, ITEM NO. 2.9000). Regarding disparities of dates as published in these editions, Thwaites was the first to note that Lewis had apparently rewritten, at least in part at a later date, the account of William Clark's discussion with Cameahwait. Some editors chose to correct the date to reflect the rewriting, as opposed to what was actually written on the journal page by Lewis, which recorded the date of the event.]

---

[29] The citations of published journal entries of Meriwether Lewis here represent the principal editions about the journals of Lewis and Clark based on the original manuscripts. There are many issues under many imprints that either simply reprint existing works, abridge them, or liberally edit and paraphrase them. The American Philosophical Society, Philadelphia, holds the majority of the Lewis and Clark journals, which had been transmitted there by Thomas Jefferson, who happened to be President of the Society concurrently with his U.S. presidency. While Meriwether Lewis and his contemporaries did not know of the Grand Canyon, and likely only superficially knew of the Colorado River, one of the purposes of the Lewis and Clark Expedition through the lands acquired in the Louisiana Purchase and disputed lands beyond, under directions from Jefferson and funded by Congress, was to ascertain the likelihood of a water-dominant route between the United States and the Pacific Ocean, a goal of course not realized. The expedition, not knowing what lay ahead as they crossed the Rocky Mountains, inquired of native tribes as to various prospects for a route. This sole mention of the Colorado River and its outlet into the Gulf of California corresponds with the meager contemporary understandings of the route and landscape of the Colorado between its headwaters and its lower reaches. One can surmise what would have become of the success of the expedition had for some reason they decided to travel southward. This quotation from the journals stands out as an early American attention to (and dismissal) of the Colorado River's transit to the sea as a potential route for communication and commerce, which however, during the 19th century, is an idea that recurs, as testified by citations elsewhere in this bibliography. [See also Jefferson (1814, ITEM NO. 2.8570).]

[30] Historians of the Lewis and Clark Expedition have well discussed a **MANUSCRIPT** map (WHEAT I:239 [as "c. 1796 The West"]) of the western part of North America by Nicholas King, 1803, now in the Library of Congress (cataloged there, in square brackets thus: "[Lewis and Clark map, with annotations in brown ink by Meriwether Lewis, tracing showing the Mississippi, the Missouri for a short distance above Kansas, Lakes Michigan, Superior, and Winnipeg, and the country onwards to the Pacific]", digitized online at https://www.loc.gov/item/98687178/). This map has been identified as having been modified from a part of the just-published map by Arrowsmith (1802, CARTOBIBLIOGRAPHY ITEM NO. 25.1192, WHEAT I:253; Cartobibliography is THE GRAND CANON Volume 2) and apparently the manuscript had been taken on the expedition. (For a discussion, see John Logan Allen, *Passage Through the Garden : Lewis and Clark and the Image of the American Northwest* (University of Illinois Press, Urbana, 1976), pp. 97-103, figure 21 [pp. 100-101].) (King's map is also illustrated in Gary Moulton, *The Journals of the Lewis and Clark Expedition. Volume 1. Atlas of the Lewis and Clark Expedition* (University of Nebraska Press, Lincoln and London, 1983), map 2.) The manuscript map includes in its southwestern part bare sketches of three rivers flowing southward to southwestward: "Rio Colorado" on the west, "Rio des los Apostolos" to its east, and farther east "Rio Norte or Rio Bravo" that is the Rio Grande. North of the headwater areas of these rivers is a broad swatch labeled "Conjectural". The course of each of these rivers is an emendation because they are displayed very differently from their courses (and labeling) on the Arrowsmith map (see below). Allen (figure 22, p. 116) also displays

1814 2.26326 [Journal entry, August 20, 1805.] *In:* [Biddle, Nicholas, ed.], *History of the expedition under the command of Captains Lewis and Clark, to the sources of the Missouri, thence across the Rocky Mountains and down the river Columbia to the Pacific Ocean. Performed during the years 1804-5-6. By order of the government of the United*

"the King 1803 map compared with a modern base map", which overlays the King river courses on the modern base map. Interestingly, and coincidentally, the "Rio des los Apostolos" parallels the upper Colorado River to its east about to the position where would be the eastern Grand Canyon; the "Rio Colorado" parallels the upper Colorado River to its west to where would be the confluence of the Colorado and Virgin Rivers. Take note as well that on many contemporary maps, the supposed river of the Apostles is usually shown west of the lower course of the Colorado River, often without definite headwaters or outlet though occasionally meeting the lowermost Colorado near the Gulf of California. On examining Allen's overlay against the King map, it is apparent that there is a disconnection; that, with respect to latitude, King placed these rivers several degrees too far north according to his lines of latitude. Although the relationships of all the rivers on King's map are faithful in proportion to each other on Allen's overlay (compared to King's original), for some reason the overlay shows the Colorado actually reaching to the correct latitude for Grand Canyon as shown on the modern base map. (For comparison here, the 1802 Arrowsmith map shows the area north and northwest of the "Gulf of California" as mostly blank. "Rio Colorado or Red River" and "R. del Coral" are depicted as separate streams, with the Colorado coming from the northeast and the Coral coming from the east; once near each other both continue on separate courses southwestward to the head of the gulf. One of the upper tributaries of the "Coral" is labeled "Rio Hillo". One of two northerly tributaries to the "Coral" is labeled "Rio del Azul or Blue R.", both of which have headwaters common with the Colorado. "Rio Bravo or Rio Rio del Norte" is more correctly shown on the course of the Rio Grande southward and southeastward from the vicinity of Santa Fe.)

[31] See also the 1805 **MANUSCRIPT** map (WHEAT II:270): "A Map of part of the Continent of North America, Between the 35th and 51st degrees of North Latitude, and extending from 89° Degrees [*sic*] of West Longitude to the Pacific Ocean: Compiled from the Authorities of the best informed travellers by M. Lewis. Note, The Missouri River from Fort Mandan in Lat. 47° 25′ 47″ N, and in Long. 101° West from the meridian of Greenwich, is corrected by Celestial Observations. The Country West of Fort Mandan is laid down principally from Indian information.", "Copied by Nicholas King, 1805." (Library of Congress, digitized online at https://lccn.loc.gov/00560525.) The southwestern quadrant of this sketch map depicts "River Colorado" and "R. de los Apostolos.", both flowing southward from headwaters south of the area of interest to Lewis and Clark; they converge at the head of "Gulf of California", where is labeled "St. Pedro". This map, as was the 1803 manuscript map, is illustrated in Allen's *Passage Through the Garden* (pp. 232-233), with a comparable overlay on a modern base map (p. 234) The 1805 map is illustrated in Moulton's *Atlas of the Lewis and Clark Expedition*, map 32b (and variants, 32a, 32c). Notably, the southwestern rivers are shown a decidedly farther distance to the west than they are in reality. The Colorado never was a river of consideration by the explorers, just one of which they were aware.]

See also, regarding an early expedition of frontiersmen (pp. 261-262): “Were it not foreign to the purpose of this article, it would be interesting to relate at some length the fate of this expedition. The most of the part were slain in battles with the Indians, and Workman and Spencer are reported to have gone through the grand cañons of the Colorado River to California in 1809, but that remarkable feat is discredited by some, leaving honors easier with Major Powell, whose expedition through these cañons was in more modern times.”]

"This invention relates to an improved scenic structure for more completely giving pictorial representations of objects—as, for example, landscapes . . . ." "The scene (usually a landscape) is painted upon the background . . . and upon the wings, according to the nature of the view. If this part of the work be done artistically, the effect is very pleasing to the eye, and an accurate impression of the natural scene can be conveyed even in cases when an ordinary drawing or flat picture does not succeed. This is notably true of such views as the Grand Cañon of the Colorado, where it is extremely difficult by ordinary means to give a correct impression of the vastness of the scene coupled with the descent of the ground before the eye, and which can be very successfully done by this means.” (ENTIRE NOTE)]

The labels for the Green and Grand Rivers in Utah are transposed, and the two rivers converge to a point at the 38th parallel where they end, not reaching the Colorado.]

Le premier, le moins scientifique mais non le moins important, est celui des simples touristes et promeneurs qui trouveront dans leurs vallées et sur leurs rebords des paysages si remarquables, si étranges que plusieurs voyageurs ayant fait le tour du monde, MM. A. Tissandier, E. Cotteau, L. Rousselet, par exemple, n'ont pas craint de les comparer aux scènes fantastiques du nouveau monde, de l'Amérique du Nord, au grand canon du Colorado entre autres.” (p. 12)] [In French.]

Mindeutgave.* [No imprint] (Folkesladet Publishing Company Trykkeri, Minneapolis, Minnesota), 280 pp. [See in "Til det Fjerne Vesten", pp. 101-120, an extended recollection by June E. Downey quoted (pp. 117-120), who notes Wergeland in a rare moment of free expression (pp. 118-119), "Jeg husker hvordan hun endog efterlignet indianerne som hun hadde set danse ved Grand Canyon i Colorado. Med sin følelse for det historiske hadde hun moret sig over dette glimt av en forbigangen tidsalder og et primi tivt folkeslag. Men selve Grand Canyon—den store flænge i jordens skjød—forekom hende forfærdelig, overvældende med sin groteskhet, med sin vilde pragt. Alt dette stod for hende som aarhundreders gravplads—altfor rædselsfuldt til at bli beundret." (ENTIRE NOTE) See also photo (between pp. 256/257), "Dr. Wergeland skriver digtet 'Rosen' ved Grand Canyon, sommeren 1913." Memorial edition.* [No imprint]: "Privately Published" (Folkebladet Publishing Company Press, Minneapolis, Minnesota), 236 pp. [See in "The Lure of the West", pp. 87-112, extended recollection by June E. Downey quoted (pp. 104-107), who notes Wergeland in a rare moment of free expression (p. 105), "I recall how she even imitated for us the curious steps of the Indians whom she had seen dance at the Grand Canyon of the Colorado. With her instinct for the historic, she had deeply enjoyed this glimpse of primitive times and of a primitive people. But the Grand Canyon itself—that immense gash in the earth—had appalled her, overwhelmed her with its grotesqueness, with its savage magnificence. It was to her as a graveyard of the centuries—too awesome to be loved." (ENTIRE NOTE) See also photo (p. 202), "Dr. Wergeland at Grand Canyon writing 'The Desert Rose'. Summer 1913." Of the other three Quarters, Asia, Africa, and America.", with a separate title-page: *A system of geography: or, a new and accurate description of the Earth, in all its empires, kingdoms, and states. Part the Second, containing the description of Asia, Africa, and America. Written in Latin by Joan. Luyts Professor in Acad. Ultraj. English'd with large additional accounts of the East-Indies, and the English plantations in America. Illustrated with maps, fairly engraven on copper, according to the modern discoveries and corrections, by Herman Moll.* London: printed for Tim. Childe. (Part II is separately paginated.)] [See in particular: "A General and Particular Description of America. First written in Latin by Joan. Luyts, and now improv'd with very particular Accounts of the English Plantations; and maps laid down according to the latest Observations and Discoveries." (pp. 148-157); specifically, Chapter II, "Northern America and the Arctick Countries" (pp. 152-157). See especially the map (p. 152), "The Isle of California. New Mexico. Louisiane. The River Misisipi. and the Lake's of Canada. Herman Moll Facit." (in the copy seen the map is inverted). The map displays the "Gulf of California" separating the island, "California" from "New Mexico or New Granada or Marata" and "P[art]. of Mexico or New Spain". Four principal rivers are shown entering the eastern side of the gulf midway through its channel (from north to south): "Bona Guia R.", "de Aguchi R.", "Tecon R.", and "de Coral R." Also of note is the misplacement (in English) of "The 7 Cittys" east of "Coral R".] [Refer also to Moll in THE GRAND CANON Volume 2 (Cartobibliography).]
